LINE MAINTENANCE

We are setup and manage Line Maintenance station at Sofia Airport for aircraft type:

- BAe146&RJ;
- Airbus A320 Family;
- ATR42&ATR72;
- B737 Classic & NG.

Our processes are organized so that we can set up a new line station very quickly.

Great experience in troubleshooting of our engineers and continuous training are our strengths in case of tricky AOG situations.

At our home base at Sofia Airport we use hangars for technical line support like defect rectification, progressive maintenance or A-checks.

In case of emergency situation we can perform fast troubleshooting and handling of your spare parts.

In the hangar

Aero Technic BG offers Base Maintenance services on aircrafts BAe146&RJ, ATR42, ATR72, B737 Classic & NG and Airbus A320 Family: C-checks, structural repairs, avionic and structural modifications, cabin reconfigurations / refurbishment, recovery of aircraft from remote storage locations as well as aircraft maintenance technical record audits.

Our highly skilled workforce ensure that your maintenance program is carried out in as short time as possible and always to the highest standards.

Our computerized system for Production Planning and Inventory Management provide excellent control and monitoring features and enables maintaining very good standards of airworthiness.

BASE MAINTENANCE

Quickly and Cost Effectively!

Through established relations with manufacturers, suppliers and repair companies, Aero Technic BG is able to provide a full logistic support package for your operation.

If required, we can also store and move spare parts or equipment within our store facility at Sofia Airport.

- As Part-145 maintenance organisation we have equipment and tools for BAe146/RJ maintenance we can offer to our customers.
- We work together with experienced airline parts shippers to provide customers with the best possible service.

AOG SUPPORT & CONSULTING

- You know keeping an aircraft fully serviced and ready for flight continuously, (24/7) is not quite simple. With experience in both- expert advise and practical assistance we can help you to save time and money.
- We can provide man-hours calculation and supplemental oversight for a large inspection package.
- We can provide Technical Evaluations and aircraft Pre-Buy inspections.
- We can give you expert advice for third party maintenance facilities and procedures.

In our workshops is performed complete maintenance – test, repair and overhaul of various aircraft systems components such as:

- Batteries and Power Supplies
- Instruments
- Galley Equipment
- Valves and Switches
- Lights and Ballast Units
- Escape Slides
- Reservoir and Valve Assembly
- Hydrostatic Tests
- Interior panels repair
- Structure components
- De-Icer Boots

NON-DESTRUCTIVE TESTING

Non-destructive testing techniques focused on minimizing maintenance costs and production downtime.

We offer all the usual test methods:

- Penetrant Testing (PT)
- Magnetic Testing (MT)
- Eddy Current Testing (ET)
- Ultrasonic Testing (UT)
- Radiographic Testing (RT)
- Thermography Testing (IRT)

AERO TECHNIC BG Ltd is EASA Approved Maintenance Organization that can complete annual FDR/CVR maintenance readouts and as well to provide in-service field support.

FLIGHT DATA READOUT

Analysis of flight data is an important part of safety assurance. Therefore many operators monitor their day to day flight operations for any exceedances and take the necessary steps to mitigate any negative trends or risks identified.

Aero Technic BG could assist the operators in flight data monitoring process with flight data processing and analysis capabilities and operational expertise.

The new hangar is operational by September 2020.
